

MANAGE THE HEAT IN YOUR HOME

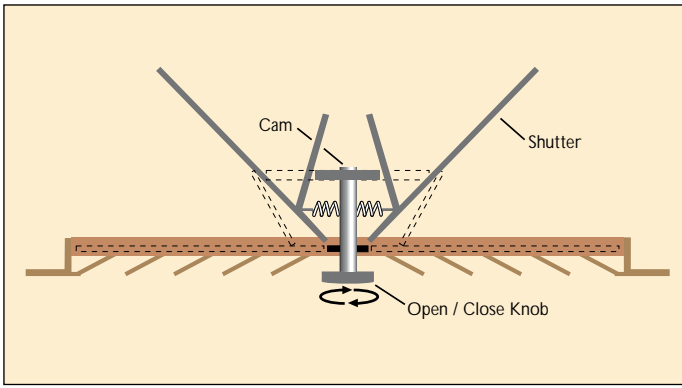

WhirlyMate

The Adjustable Ceiling Vent
that expels hot air in summer
but retains warmth in winter.

Edmonds

CAM OPERATED OPENING AND CLOSING MECHANISM.

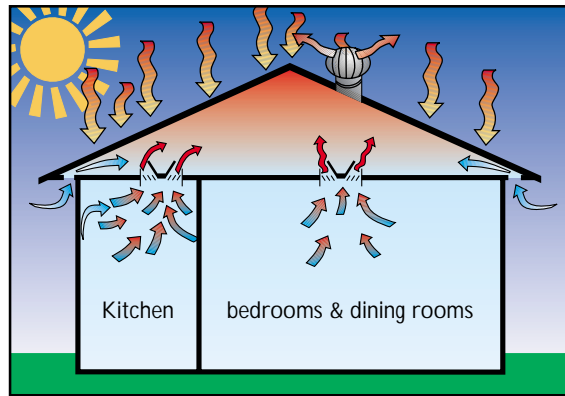

WHIRLYMATE IS MADE OF ATTRACTIVE WHITE ABS AND MATCHES MOST DECORS.

CLOSABLE CEILING REGISTER GIVES YOU RELIEF WHEN NEEDED.

WHIRLYMATE is a closable ceiling register which allows you to control the flow of heat from a room. During summer, the vent is easily opened to allow warm room air to be drawn into the attic space for removal by a roof ventilator. Then, in winter, the vent can be closed to prevent loss of home heating.

WHIRLYMATE is very easy to install and simple to open and close. A feature is the ease of operation using a simple wand when installed in high ceilings. Its grille complements most decors and is made of attractive white ABS. A feature is the unique, maintenance-free, shutter mechanism (patent applied for).

bedrooms and living areas. Hot air is then released from the home and vented through an Edmonds turbine ventilator such as the SUPAVENT, or the powerful, thermostat controlled, MAESTRO or solar powered SOLACOOOL. In winter, WHIRLYMATE is simply closed to prevent heat escape from the home.

WHIRLYMATE IS EASY TO INSTALL AND OPERATE.

Installation is a simple process involving the removal of a small section of plasterboard ceiling and the clip-in insertion of the register. The kit includes an operating tool which can be fitted to 16mm dowel to make a 'wand' for use with high ceilings. For ceilings with limited cavity space (i.e. less than 150 mm) a mounting box is available to assist with installation in these difficult areas. The WHIRLYMATE mounting box is a white aluminium frame that enables full operation of the opening and closing shutters.

THE SOLUTION TO CATHEDRAL CEILING HEAT BUILD-UP.

While modern home design, with large glass areas, low or cathedral ceilings and second storey additions can be architecturally pleasing, they also allow summer heat to

WHIRLYMATE WARRANTY

Edmonds Products (Aust) warrants this product for five years against defects due to workmanship or parts when installed according to the instructions.

enter and collect in the home. Air conditioning is an expensive and energy inefficient solution. The answer is to install a WHIRLYMATE in hot rooms, such as kitchens,
