ATLITE
ROOF WINDOW

Australia's most awarded and advanced roof window technology just for you.

Designed specifically for you, ATLITE's award-winning roof window appeals to architects, designers and homeowners alike. Creativity knows no bounds as this sleek, modern design can be crafted to fit any size and shape to suit your home or workplace. Select one of our standard designs or choose from our fully customizable options to create the roof window you need.

This patented revolutionary design by the ATLITE team of engineers in collaboration with Swinburne University Centre For Design Innovation incorporates Australia's most advanced skylight technology. Just like a stunning piece of art, our innovative Roof Window will enhance your surroundings with exclusive, controlled access to natural light and air flow. a feature in any room, ATLITE Roof Window creates a welcome ambience to be enjoyed by all.

AUSTRALIAN MADE SKYLIGHTS

LET THERE BE LIGHT!

Embrace the delight of natural light. Manufactured with premium quality double glaze glass, with a selftinting option, our advanced-technology roof window reduces glare and optimizes light flow in your room. With flyscreens standard on all openable Roof Windows, you can also enjoy the flow of fresh air. Browse our range of additional options to suit your unique needs.

ENERGY SAVING, HEATING AND COOLING

Enjoy every season with ATLITE’s 5-star energy rated premium Roof Window. double glazed glass (compliant with Australian building code regulations AS1288-2006) keeps out the heat on hot summer days, while helping maintain a steady internal temperature during chilly winters. Take advantage of natural ventilation with the option to open or close your skylight. Rest assured, your bespoke skylight will

safely provide energy saving insulation all year-round while blending seamlessly with the design of your home or workplace.

COMBAT WEATHER EXTREMES

Skilfully engineered to withstand extremes of weather, your ATLITE Roof Window has been rigorously tested to ensure it will remain leak-proof, fire-resistant (tested to AS3959 bushfire attack level test) BAL40 rated, non-combustible and rain, hail and cyclone resistant* in extreme conditions. The sleek edge-to-edge frameless design eliminates the risk of water retention and leakage, creating a strong, resilient product. Tested to AS4285 water leak test, this award-winning skylight is designed to meet all relevant Australian standards.

ATLITE ROOF WINDOW

STANDARD VS CUSTOM

We work with you to create the most suitable product for your chosen space. With an existing range of twenty standard shapes and sizes, our in-house manufacturing team can ensure a quick turnaround for Roof Windows with standard specifications.

Alternatively, this product can be custom made to fit any size or shape. Designed to complement the architecture of your room you can explore your creativity with this exciting Australian innovation.

ATLITE PREMIUM EXTRAS

OPENS EASILY

Trust your Roof Window to work for you, providing natural light and ventilation with ease. Operated manually or by remote control which is simple to program and able to integrate with your home or building management system. There's no need to worry, in the event of an unexpected shower, the automatic rain sensor in the electric roof window will close the window keeping your room safe and dry.

GLASS TINT OPTIONS

With sleek, edge-to-edge clear glass as standard, or choose from our custom range of tints; opal, grey, solar cool evergreen, blue and bronze – there is a colour to perfectly suit your space.

Utilizing thermochromic technology, our advanced self-tinting laminate will vary your tint from clear to dark, depending on the intensity of the sunlight hitting the window. Particularly important in warmer climates, the self-tinting option will adapt to your environment's changing needs of heat and light.

ATLITE BESPOKE

Don't limit creativity by opting for a standard square or rectangular skylight. ATLITE can match your creativity and work with any design to create something special for your space and specifications.

The ATLITE Roof Window can come in any size or shape -triangle, hexagon, rhombus fixed or openable

FINISH

Standard finish on the Roof Window is white internal finish with a monument powder coated external frame. Other colours as optional

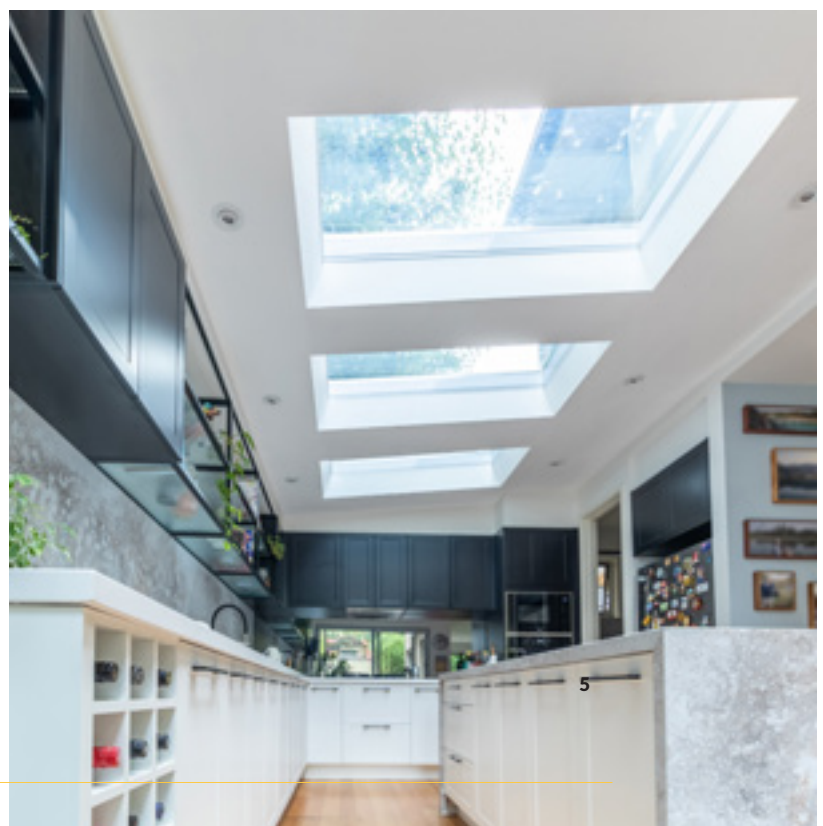

Fixed, manual and electric opening options.

Clear glass as standard, also available in opal, grey tint, solar cool supergreen, blue tint and bronze tint.

Manufactured with optional self-tinting glass from clear to dark by direct sunlight.

(AS3959 bushfire attack level test, AS1530.8.1 fire test.

Tested to AS4285 water leak test. Manufactured to comply with AS1288 overhead glazing requirement)

ATLITE ENERGILITE

Reduce your energy bills with the multi award winning ATLITE Energilite - the first Australian designed and manufactured skylight to achieve a 5-star energy rating.

Double glazed glass combined with our exclusively designed aluminium frame works to maintain a steady internal temperature during chilly winters, while keeping out the heat on hot summer days. rest assured, your ATLITE skylight will safely provide energy saving insulation all year-round while blending seamlessly with the design of your property.

Our 5-star rating is determined by the Window Energy Rating Scheme (WERS). You'll save money and gain peace of mind by installing an ATLITE Energilite. This efficient system with high insulation properties is an environmentally conscious solution for any home or workplace

TOP REASONS WHY THE ENERGILITE IS THE BEST SKYLIGHT ON THE MARKET

- This product complies with the Australian Standards AS4285-2017 (skylights)
- 5-star rating is achieved as a result of the air tight unit created by the combination of the double glazed IGU and unique ATLITE aluminium frame
- 5-star rating is determined by the Window Energy Rating Scheme (WERS) for Skylights Program
- Designed to comply with AS4285-2017 Australia Standards testing for Skylights (Water Leakage)
- Manufactured to comply with AS1288-2006 Glass in Buildings-Selection and Installation
- All ATLITE products are made under ISO 9001 Quality System
- Australian Designed, Manufactured and multi-award winning product
- 15 Year Product Warranty
- AS3959 Bushfire Attack Level Test – BAL 40 rated
- ATLITE is a Skylights Industry Association (SIA) member with over twenty years' service to the Master Builders Association (MBA)
- Reduce UV by up to 95%. Energilite's double glazed IGU which is 6mm high performance toughened Low E outer layer and has 12mm argon gas infill and 6.38mm clear laminated inner glass
- Plaster Shaft finished 5mm away from the glass with a casing bead. No internal rebate for plaster to create that seamless finish from roof to ceiling
- Complement the architecture of your room with Energilite's sleek, modern design
- Our low profile, compact design suits all roof types and pitches, with NO roof pitch restrictions.
- Match the look of your roof with our standard monument top frame. ATLITE can powder coat the top frame to any COLOURBOND® steel colour and will provide the flashings to suit all roof types

ATLITE SKYDOOR

Breathe new life into your traditional rooftop access with our innovative Skydoor. Doubling as an access hatch, this fully functional ATLITE Skydoor appeals to home owners, architects and designers alike. Our modern design provides a welcome alternative, providing both attractive roof access and natural lighting to your home or workplace.

UNIQUE FEATURES

1. Double glazed glass provides excellent thermal characteristics to consistently manage heat loss and gain.
2. UV rating and solar-heat-gain-coefficiencies for heat loss and heat gain control
3. Powder coated finish, non-corrosive, non-combustible aluminium and excellent for beach side and bush fire areas
4. Powder coated monument frame and bright white base extrusion as standard
5. Electrically operated linear actuators open and shut your Skydoor hatch via remote control
6. Flashing for installation on prepared upstand.
7. Compatible with stair ladders, the Skydoor provides safe and simple roof access with the added advantage of natural light flow

WHY A SKYDOOR IS THE PERFECT FIT

- Sleek, edge-to-edge clear glass as standard, or choose from our custom range of tints - opal, grey, solar cool evergreen, blue or bronze
- Double glazed glass maintains a year-round steady internal temperature
- Match your roof with our standard ZINCALUME® finish, custom powder coated to any COLORBOND® steel colour. Flashings available.
- Non-corrosive, non-combustible finish is excellent for beach and bush fire areas
- Low profile, compact design suits all roof types and pitches, with no restrictions
- Rigorously tested - leak-proof, fire-resistant (BAL40 rated), non-combustible, rain, hail and cyclone resistant* in extreme conditions
- Compliant with AS 4285-2017 Australian standards testing for skylights (water leakage) and AS1288-2006 glass in buildings-selection and installation
- Nano coating to the glass is standard on our standard sizes
